

DARSHAN

ADHIKARI

CAREER OBJECTIVE

Motivated and detail-oriented senior Computer Science student with a strong foundation in data analysis, full-stack development. I am interested in pursuing opportunities in the field of data analysis, where I can apply my analytical skills and technical knowledge to solve real-world problems. Proficient in Python, Java, Flask, MySQL, JavaScript, HTML, and CSS, with experience in developing comprehensive web application

Projects

Full-Stack Web Application for Restaurant Orders and Rewards Management

- **Technologies Used:** Python (Flask), MySQL, JavaScript, HTML, CSS
- Developed a dynamic web application to manage restaurant orders and rewards. Implemented the backend API using Flask to handle customer data, orders, and rewards, integrating a MySQL database for persistent storage.
- Designed a responsive front-end interface using HTML, CSS, and JavaScript, allowing users to place orders, view order history, and redeem rewards.
- Implemented complex SQL queries and triggers to manage the rewards system, ensuring accurate and real-time updates of customer rewards based on their order history.

JavaFX Ball Game Application

- **Technologies Used:** Java, JavaFX
- Developed an interactive ball game using JavaFX, providing a rich graphical user interface.
- Implemented game mechanics including collision detection, score tracking, and increasing difficulty levels.
- Designed the game to be responsive and engaging, ensuring smooth gameplay and a visually appealing experience.
- Focused on object-oriented principles to create modular and maintainable code, allowing for easy enhancements and future updates.
